

While using energy-efficient fluorescent light bulbs (both tubes & compact) is great for the environment and saves you money, it is **illegal to throw these bulbs in the trash**. To assist you in protecting the environment and our employees, we have listed the locations that accept items that fall under the definition of "Hazardous Waste". This list is not all-inclusive nor are any sites endorsed by G-Men Environmental Services, Inc. You may also visit [911earth.org](http://911earth.org) or call (800)450-9278 for more information as to what other "Hazardous Waste" items the disposal sites accept.
